

Opening Webinar of the NENUPHAR project - register!

*Basics and good practices of
collaborative governance in
nutrient pollution handling and
nutrients recycling*

28 July, 13:00, Online

Three Horizon Europe projects — **NENUPHAR**, **GREENHOOD**, and **SEACURE** — are joining forces for a webinar on collaborative governance and stakeholder engagement in nutrient pollution management and nutrient recycling. Bringing together experts, practitioners, businesses, researchers, and policymakers, the session explores how better governance can unlock more sustainable and effective nutrient management across Europe.

About the event

How can we make better use of valuable nutrients while reducing pollution? This webinar addresses that question head-on, with presentations spanning governance theory, real-world case studies, and cross-project experience.

The agenda includes

- 1 An introduction to the concept of **collaborative governance** and its implications for nutrient management.
- 2 Corporate innovation in practice: a case study from **ProfiKomp**, a Hungarian waste management company.
- 3 Insights into the **SEACURE** project's contribution to innovation ecosystems and policy development.
- 4 An overview of the governance approaches developed through the **GREENHOOD** project, including the methodology behind the **Governance Labs**.
- 5 A closer look at multi-level nutrient governance in the **Ebro River Basin**, presented by the **NENUPHAR** project.
